Categories: Critical Information

Hi Brooks,

Your notes look great. I added a couple of very small tweaks, tracked for your consideration. Donna Musa of the Bellevue Toxics Cleanup Program said she'd be glad to talk to you about what their ranking, etc. You can contact her at (425) 649-7136 or dmus461@ecy.wa.gov. Donna forwarded me a link to the TCP webpage for [Treoil Industries](#), which you may already be familiar with.

One of our requirements in the order was that they designate all of the materials on site, and properly dispose of those that are waste. A number of containers were taken off site but the disposition remains unaccounted for. Atul Deshmane of Whole Energy said he took some of the material for use in their processes at Whole Energy. I've asked him for a list of what, when, how much, etc. He agreed to provide this information, but never did.

Wish us luck.

Susan

Subject: My notes from Treoil Mtg Wednesday

Susan/Mindy-

Thanks for taking time to discuss the complex history and conditions at the Treoil site. I spent a little time going over my notes in preparation with our meeting with our managers next Tuesday. I found it helpful to go back over various bits of information and get them in some semblance of an order. I have attached a three-page document with these notes that I would welcome any corrections or feedback on. I also would be interested in getting a more solid understanding of the role the TCP may play in this site. My very loose understanding is that your spill responders don't have a lot of authority unless there is waste known to be migrating off site. I think I gathered that TCP could address the site but the process would potentially be lengthy and not address the risks in a timely enough manner. Let me know if there is more detail that I should be aware of there.

I am specifically including the two of you on this email because your program is in the lead on this site and I have been working with you the longest on it. Feel free, however, to share this with Raman, Stephanie, or Whatcom County HD if you think it would be valuable to do so.

I look forward to talking with you again after our meeting Tuesday.
